Advanced shooting techniques

The Italian Army snipers, highly specialized in long-distance precision shooting techniques, tested their skills by operating with different types of weapons against targets at progressive distances, both in daylight and nighttime conditions. The activity required not only perfect technical mastery but also high mental readiness and decision-making ability, essential for operating in high-intensity scenarios.

The *Victrix Scorpio V*, like all Victrix rifles, guarantees 1/2 MOA accuracy at 100 meters, ensuring extremely accurate shots regardless of caliber and operational conditions.

Mutual exchange and growth

Each phase of the training represented an opportunity for mutual exchange and growth among the various units involved, allowing for the exchange of experiences, methodologies, and best practices. The interaction between units with different specializations optimized resource use and improved the overall effectiveness of operational capabilities, strengthening cooperation among Army units.
