

Middle East Peace: Trump Announces Ceasefire Between Israel and Iran

Published on 24/06/2025

The ceasefire between Israel and Iran, officially in effect at 6 AM Italian time on June 24, 2025, marks the end of a 12-day conflict that endangered the entire stability of the Middle East. The agreement, the result of intense negotiations and largely mediated by Qatar, had an immediate impact, but not without controversy. Donald Trump's announcement, in which he publicly declared that he had the courage to stop a war that could have lasted years, underscored the importance of this outcome. Trump urged the two nations not to violate the agreement and welcomed the end of the "12-Day War," calling it a war that could have destroyed the entire Middle East, but fortunately did not.

A crucial element that led to this truce was the strategic intervention of the United States, which with operation "Midnight Hammer" delivered a direct blow to Iranian nuclear sites, hitting the Fordow, Natanz, and Isfahan facilities. These attacks temporarily neutralized one of the most critical aspects of the conflict, the Iranian nuclear program, reducing pressure on Israel and paving the way for a ceasefire. Trump's decision not to respond to a targeted Iranian attack on an American base in Qatar, which caused no casualties, also helped avoid an escalation. The Iranian response was interpreted as a propaganda move, similar to what happened in 2020 with the attack on U.S. bases in Iraq, without pushing the conflict towards a direct confrontation.

The Role of Qatar and the Complexity of the Ceasefire

While the ceasefire was formally achieved thanks to the efforts of the United States and Qatar, the situation on the ground was not without complications. Qatar, which played a crucial role as an intermediary, announced that the negotiations were only possible due to Iran's willingness to halt attacks in exchange for a guarantee that there would be no further raids by the United States. Qatar's mediation was therefore crucial, combining American diplomatic efforts with the need to avoid a large-scale war in the heart of the Middle East.

Despite the announcement of the ceasefire, the situation in Israel remained tense, with new Iranian attacks hitting the south of the country. In Beersheba, a ballistic missile killed four people and injured about twenty others, demonstrating that although the agreement was in place, the violence did not stop immediately. The official statement from Iran, confirming the acceptance of the ceasefire, nevertheless marked an important step towards stabilization, with the intent to avoid further damage and resume dialogue.

Future Prospects and Challenges for Regional Stability

With the entry into force of the ceasefire, the world welcomed with hope the end of a war that seemed destined to last for years. However, the path to lasting peace in the Middle East remains uncertain. Despite the Iranian missile attacks, the United States and Israel have confirmed they do not want to react militarily, in an attempt to consolidate the truce and initiate a phase of reconstruction and negotiation. Trump publicly urged both nations to respect the agreement, emphasizing that if the ceasefire was maintained for 24 hours, it would be officially considered the end of the conflict.

But, as noted by the Israeli official who spoke to CNN, Israel still has some military objectives in Iran to complete. These objectives could lead to new developments in the coming weeks, so the stability of the agreement could be tested. Netanyahu's statement, that Israel is "very, very close to completion" of the military objectives, suggests that even if the truce is in effect, operations may continue in parallel, with the aim of not allowing the situation to degenerate into

a prolonged conflict.

In conclusion, while the ceasefire has brought a pause to hostilities, the real challenge will be ensuring that diplomatic agreements are respected and that the two nations can embark on a path of lasting peace. The coming weeks will be crucial to observe if the truce will hold, if negotiations will succeed in avoiding new tensions, and if diplomacy, supported by the United States and Qatar, can lead to lasting stability in the Middle East.
