

The 9th Cyber Security Regiment "ROMBO" achieves a prestigious 3rd place at Defence Cyber Marvel 3

Published on 22/02/2024

In the context of the important cyber exercise, Defence Cyber Marvel 3 (DCM3), the 9th Cyber Security Regiment "ROMBO" of the Italian Army demonstrated its capabilities by achieving an honorable third place out of 46 participating teams, and second place among the European teams.

The exercise, which involved 46 teams from 19 different countries, offered a crucial opportunity to test and improve cyber defense capabilities in various fields, including artificial intelligence, quantum computing, and the protection of critical infrastructures.

The Italian team, collaborating with some elements of the 5th Military Intelligence Battalion of the British Army, demonstrated remarkable skills in managing simulated cyber attacks by specialists from the NATO Cooperative Cyber Defence Centre of Excellence in Tallinn (CCD-COE). Through complex scenarios, the regiment highlighted its competence in protecting critical infrastructures and managing cyber threats.

This participation underscored the importance of international cooperation in countering cyber threats and ensuring the protection of vital infrastructures and IT systems.

In conclusion, the success of the 9th Cyber Security Regiment "ROMBO" at Defence Cyber Marvel 3 is a testament to the determination and professionalism of the Italian armed forces in the field of cyber security. This result not only honors the regiment itself but also the entire Italian Army, demonstrating their commitment to ensuring security and stability in the rapidly evolving digital world.
