

Una Acies 2026: Training Phase Concludes for 207th Course

Officer Cadets conducted squad command activities using drones, simulations and digital Command and Control systems.

Published on 05/10/2026

The final phase of the first year of training for Officer Cadets of the **207° corso "Fermezza"** at the Modena Military Academy has concluded at the **Monti di Sant'Andrea** training area, at the Infantry School in Cesano.

The activity was part of the **"Una Acies 2026"** training campaign. Army Training, Specialization and Doctrine Command commander Lieutenant General **Antonello Vespaziani** was present.

The cadets took part in activities designed to develop squad command capabilities in large-scale operations. Training covered the planning and employment of various assets and units in a combat environment.

Technology and simulation in the exercise

The training phase focused on the use of **technological systems** and advanced simulation tools. Drones and digital Command and Control systems were also employed.

Through the **TC2** system, future commanders were able to practice digital planning with a continuously updated local operational picture. Activities took place in a complex scenario designed to replicate realistic operational conditions.

Visits to specialized units

The program included visits to several Army organizations. The cadets visited the **Comando Artiglieria Controaerei** in Sabaudia and the **6° Reggimento Genio Pionieri** in Rome.

Training also involved the **7° Reggimento Difesa CBRN** and CEPOLISPE, the Centro Polifunzionale di Sperimentazione, in Montelibretti. The cadets also attended a demonstration of the assets and capabilities of the **9° Reggimento Sicurezza Cibernetica “Rombo”**.

The conclusion of “Una Acies 2026” thus marked the end of the final training phase scheduled for the first year of the 207° corso “Fermezza”.
